MS-9300 Stencil Cutting System

*** TO BE USED WITH PARALLEL PRINTER PORT CONNECTION ONLY**

The MS-9300 is a cost effective imprinting solution that acts as a slave to your existing software. Commonly used with such well known programs as MS Word, Excel, Corel Draw and Autocad, to name a few. This imprinting system delivers a high quality print on our regular and heavy-duty stencil paper products in 2.5" wide, 3.75" wide and 6" wide tractor feed varieties. Available in Blue or Green. Can work with any Windows True Type font.

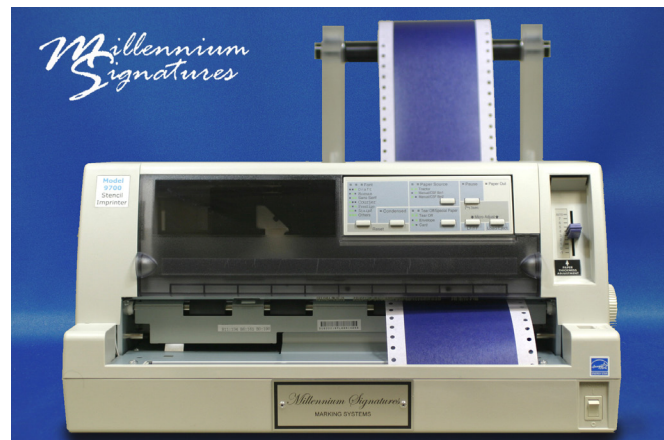

A Turnkey Solution for producing both metal and glass (window) etch stencils on demand. The MS-9300 is ideal for part numbers, serial numbers, date codes and radial arc marking. The MS-9700 has all the capabilities of the MS-9300, and can also do MIL STD 130, DOD IUD and 2D Data Matrix marking.

MS-9700 Stencil Cutting System

Manufacture Electro-Chemical Etch Stencils in your facility with the MS-9700 Stencil Cutting System. The easy to use computer-based program required for the MS-9700 is designed for fast, convenient use on the factory floor.
